## RELEVANT EXPERIENCE

### **Big Nerd Ranch** | Software Developer, Oct 2017 - Present

As a consultant, I build both Web and Android apps, focused on Front-End JavaScript and Android development with Kotlin. I teach week-long *Front-End Essential with React* courses for clients to level up their teams in modern JavaScript web development. On the Android team, I work on hardware IOT devices running the Android OS as well as mobile devices, focusing on UI and layout work for efficient data loading and rendering.

### **Itential** | Software Engineer, May 2017 - Oct 2017

Developed and tested a MERN-stack (MongoDB, Express, React, Node) network automation application within the Software Defined Network industry for Internet and Telecommunications Service Providers. On the Projects team, I coded custom client-specific feature requests, wrote unit tests to ensure code strength, and worked closely with clients to teach our technology.

### **Georgia Tech Coding Bootcamp** | Teaching Assistant, Apr 2017 - June 2018

Worked closely with students to guide their learning experience, troubleshoot their code, and tackle technical bugs or gaps in comprehension. Held office hours to assist students one-on-one and answer questions candidly about starting a software career from a bootcamp grad perspective. Six-month full-stack JavaScript program.

### **Ecological Biodiversity Lab** | Lab Assistant, Sept 2013 - June 2014

Performed highly analytical lab procedures in an NSF-funded Sustainable Biofuels Experiment to examine which combinations of algal species promote the greatest biodiversity and have the highest potential to produce sustainable biofuels in efforts to bring alternative energy sources to viability at scale.

## EDUCATION

### **DigitalCrafts** | Atlanta, GA — Full Stack Web Development Immersive

Nov 2016 - Apr 2017

Top-rated immersive modern web development program

### **University of Michigan** | Ann Arbor, MI — B.S.

2010 - 2014

Earth and Environmental Sciences

## SKILLS

### **Android Development:**

Java & Kotlin  
Android Studio Code  
XML

### **Front End Web:**

HTML, CSS  
jQuery  
JavaScript (ES6)  
Vue.js  
React.js, Redux

### **Back End Web:**

Node.js  
Express.js  
Python  
MySQL  
MongoDB

### **Dev Tools:**

Git & GitHub  
Chrome Dev Tools  
Agile Development  
Test-Driven  
Development
